Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

I have a total of 41 papers, 5 of which are Q1 and 4 of Q2. I have also attended and presented 30 papers in seminars and conferences. The projects in which I have participated are five: two projects from the European Union about the study of the impact of the climatic change on the flora of the Pyrenees, one for the mobility between Natural History Museums in Europe, one (from American foundation) to digitalize the type sheets conserved in the herbaria and another national project as technician team to study the Cannabis. I have carried out duties for supervising four undergraduate students of the Bachelor's degree courses in Biology, three MSc thesis student and one PhD researcher (UB, UAB). Nowadays I am currently supervising a doctoral student who is working on Historical Herbaria conserved in the Botanical Institute of Barcelona. Apart from this, our group are developing a new line of research about alien plants in our country. My main interests are to demonstrate changes in the flora over time, extinctions, regressions or introduction of species through historical herbaria and the search for type specimens and herbarium vouchers of taxonomic or nomenclatural interest.

General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.
